1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 21, 2005 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5, 7-12, 15-18, 20, 28-30, 32-35 and 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Hill (columns 8, 10, 12, 13, 15-17 and 20).

Hill discloses a coated chewing product having an emulsion coating including various zinc compounds, e.g. zinc chloride and each of applicant's other claimed components. Additionally, Hill (column 8, lines 38-44) discloses that the claimed emulsion coatings of his invention (claims 1, 2, 4 and 9) can also be present in liquid center chewing gums.

Art Unit: 1761

5. Claims 6, 19, 31 and 40-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hill in view of D'Amelia et al.

It would have been obvious to substitute a copper salt as claimed by applicant for the zinc salt used in Hill since both copper and zinc salts are used alternatively as breath freshening additives in chewing gum, as evidenced by D'Amelia et al (columns 1 and 2).

6. Applicant's arguments with respect to claims 1-12, 15-20, 28-35 and 37-49, submitted March 21, 2005 have been considered but are moot in view of the new ground(s) of rejection.

7. Any inquiry concerning this communication from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can generally be reached on Monday--Friday from 10:30 to 8:00 p.m..
